

COMPANY

- The company has provided reliable and economic logistic services across a wide range of industrial and commercial sectors for more than 30 years
- Their highly experienced team specialises in the supply of high quality sequencing and logistics services to the defence, automotive, aerospace and fast moving goods industries

OVERCOMING UNCERTAINTIES

- AMCO has adopted a research and detailed testing approach to overcome uncertainties
- The company has market leading experience in its chosen area of expertise and develops solutions to the issues that occur during the development of new systems

TECHNOLOGICAL ADVANCES

- Significantly improve stock accuracy
- Improve stock movement and reconciliation
- Increase access and visibility of data and information
- To design a system that can be accessed from desktop PC's and handheld devices

MSC Associates

TECHNOLOGICAL UNCERTAINTIES

- No precedent for the design of a comprehensive set of integrated on line and off line management tools to help the automotive industry
- No pre-existing electronic benchmark data to support KPI's

"The team at MSC analysed our systems with vigour and professionalism and we were delighted with the result. We would certainly recommend this company for any R&D"

Graham Storry, CEO of Company
